National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A) Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-9000a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

Historic name Virginia School District #33

Other name/site number Missionary Baptist Church / 091-0000-0724

2. Location

8. Statement of Significance

Applicable National Register Criteria

(Mark "X" in one or more boxes for the criteria qualifying the property for National Register)

- ☒ **A** Property is associated with events that have made a significant contribution to the broad patterns of our history
- ☐ **B** Property is associated with the lives of persons significant in our past.
- ☒ **C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- ☐ **D** Property has yielded, or likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

- ☐ **A** owned by a religious institution or used for religious purposes.
- ☒ **B** removed from its original location.
- ☐ **C** a birthplace or grave.
- ☐ **D** a cemetery.
- ☐ **E** a reconstructed building, object, or structure.
- ☐ **F** a commemorative property.
- ☐ **G** less than 50 years of age or achieved significance within the past 50 years

National Register of Historic Places Continuation Sheet

Section number 7 Page 1

Virginia School District #33
Johnson Co., Kansas

RELOCATION APPROVAL

Constructed c. 1877, the Virginia School District # 33 is a one-story, frame school building covered with a metal-clad, gable roof. A small wood bell tower, also covered with a galvanized metal gable roof rises from the vestibule's roof. Listed in the National Register of Historic Places on 5/19/2004, the school is located at the northwest corner of 71st Street and Clare Road within the city limits of Shawnee in Johnson County. The land the school is sited upon has recently been placed under a contract to be sold for development, and the Virginia School will either be removed or demolished. The Monticello Community Historical Society, Dennis Hillhouse (the current owner of the school), the DeSoto School District, and the City of Shawnee worked together to find a solution to save the school. They are proposing moving the school approximately 1.5 miles southwest of the current location to a site on the grounds of Mize Elementary School at 7301 Mize Road. The topography is the same and the school would be oriented in the same direction (facing south). The two-door outhouse will be demolished.

Relocation Plan

The Virginia School is being moved to save it from demolition. Three parties – the Monticello Community Historical Society, the DeSoto School District, and the City of Shawnee – are committed to saving the school and putting it to use as a teaching tool at its new location. The decision to move, (rather than demolish) the school came, in part, because the building is intact and in good condition. The loss of integrity will be almost exclusively to the environs. While efforts are being made to site the school nearby and orient it in the same direction, it will lose its original surroundings – including the outhouse. The new site includes open space and a tree line that will help convey the original rural setting. It is anticipated that the only loss of integrity of materials will be the limestone foundation. The stones will not be relocated, and the school will instead be situated upon a concrete slab foundation.

Prior to the move, the brick chimney will be taken down to prevent collapse. It will be rebuilt in the same dimensions probably using replacement brick. The current chimney is painted and has some damaged bricks. It has been determined that the structural system of the school building is a combination of wood frame and heavy timber post-and-beam construction. The structure will be raised off its original limestone foundation and supported on a three-point unified jacking system and moved on pneumatic tire hydraulic dollies. During the moving process, an examination of the structural system will be made to determine if any repairs shall be made before the building is placed on its new concrete foundation.

The Monticello Community Historical Society has received a significant grant from Johnson County to restore and furnish the school building. Plans include replacing the metal roof with a more historically accurate wood shingle roof, painting the exterior, reglazing and repairing the windows, refinishing the wood floors, and restoring the walls and wainscoting. All work will be done to preserve the integrity of

**United States Department of the Interior
National Park Service**

**National Register of Historic Places
Continuation Sheet**

Section number 7 **Page** 2

Virginia School District #33
Johnson Co., Kansas

the structure's original materials. The site will include a concrete pad surrounding the entrance and a single step into the building. The building will be accessible to the public at designated times, at the discretion of the DeSoto School District. The district intends to use the Virginia School as a Kansas history-teaching tool for their elementary school students. The historical society will partner with the district to provide historical interpretation.

Archeological Review of Proposed New Site

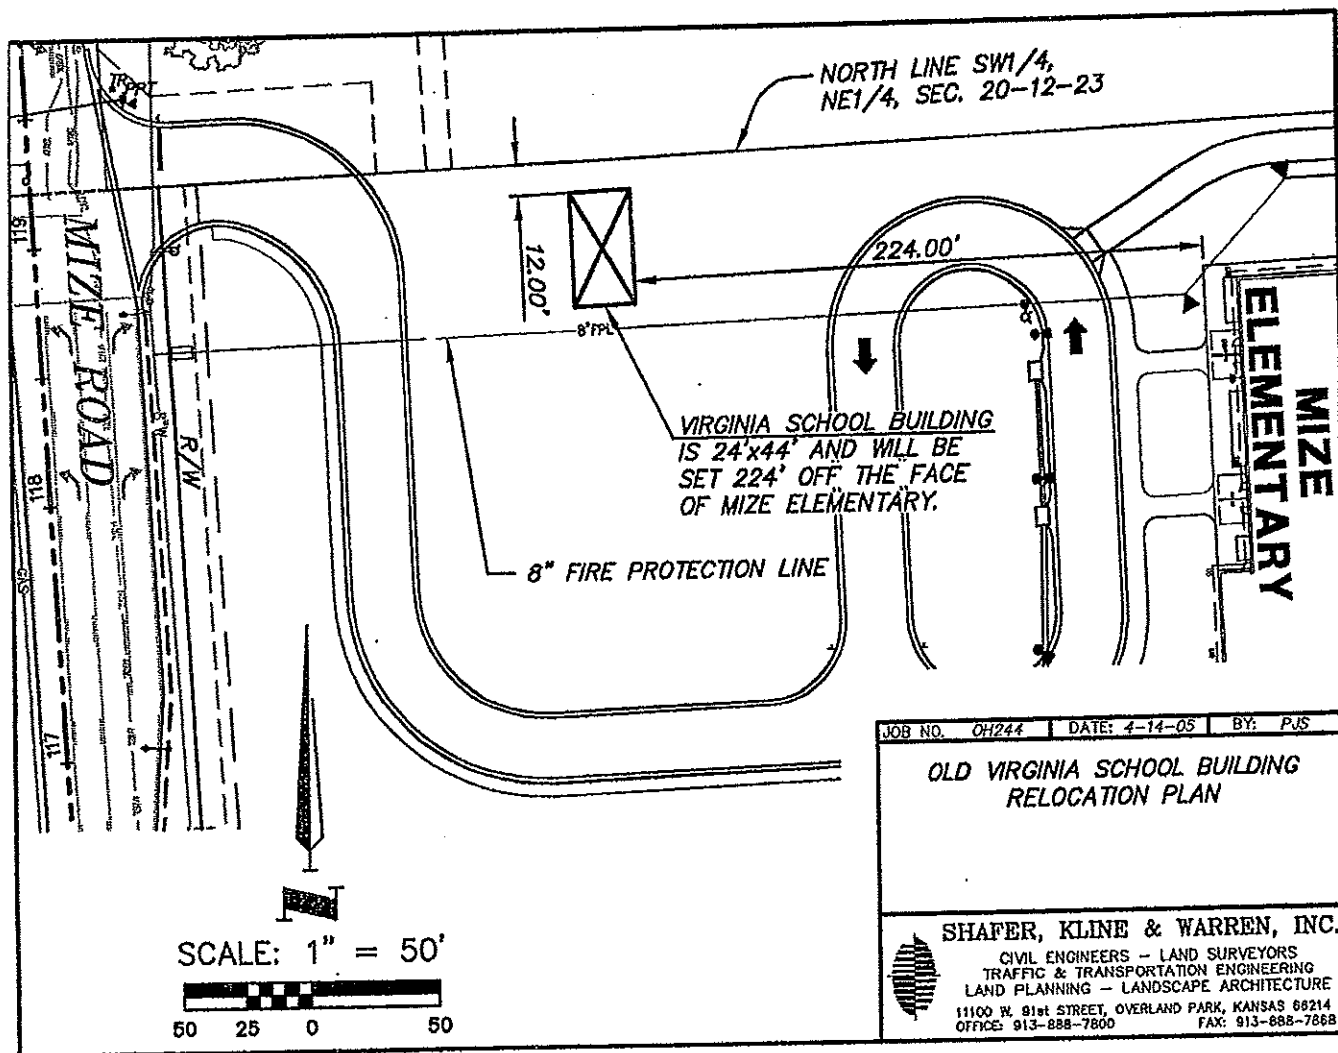

The Kansas State Historic Preservation Office has reviewed its cultural resources files for the area proposed for relocation of the Virginia School District #33 Building in accordance with 36 CFR 800. The proposed new location is situated northeast of De Soto in northern Johnson County. It lies on a slope overlooking the west side of Clear Creek, a perennial tributary of the Kansas River. The proposed location is approximately ¼ mile west of the creek in an area, which possesses low potential for archeological sites. The proposed school building relocation project should therefore have no effect on properties listed on the National Register of Historic Places or otherwise identified in our files. This office has no objection to implementation of the project.

CRITERIA CONSIDERATION B

The proposed new location for the Virginia School District #33 building meets the requirements of Criteria Consideration B. Under Criterion C, all of the significant architectural features will be retained, and the site is within close proximity with similar topography to the original location.

The Virginia School District #33 was also originally nominated under Criterion A for its association with early education efforts in Johnson County. As the only surviving building associated with the history of the Virginia School District #33, the proposed new location meets the requirements of Criteria Consideration B for historical associations as well.

This building was the only schoolhouse in Virginia School District 33. All children in District 33 received their education in this one room school from 1878 to 1962. Hundreds of children completed eight grades in this one room, having received a quality education in all basic required courses. The building is the only surviving resource in the history of education for this specific area of Johnson County. In addition to serving as a school, it was a community building, used for church services, Sunday School, a lyceum program, and various other gatherings.

The proposed new location is well within the original boundaries of the Virginia School District #33 when it was organized in 1865. The first school building for the district was actually located one-half mile east of the present school. That school building was sold and moved to a nearby farm when the current building was constructed c. 1877.

There is also an interesting tie between the Virginia School and the new Mize Elementary School where the proposed new site is located. In 1875, C. J. and Sarah Mize deeded one acre to School District 33 for the current Virginia School District #33 building. Records show the Mize family, some of the township's earliest settlers, was dedicated to educating the children of the community. Children of the Mize family attended the Virginia School for several generations, including Isabel Mize Golden and Maxine Mize Renner in the 1920s. In 2000, when the DeSoto School District built their new elementary school at 7301 Mize Road, it was built on property settled by the original C.J. Mize family and named for the two previously mentioned Mize sisters, who still reside in the area.

Continuation Sheet

Section number 7 Page 1

Virginia School (c. 1877) is located at 71st Street and Clare Road within the city limits of Shawnee in Johnson County, Kansas. The building stands on a 208 foot by 208 foot lot in the southeast corner of SE1/4, SE1/4, Sec. 17, T. 12, R. 23. Bounded by 71st Street to the south and Clare Road on the east, a woven wire fence bounds the property to the west and a brome pasture on the north. Blacktop streets run along the east and south sides of the property.

A cistern stands at the southwest corner of the building. A two-door outhouse stands on the northeast corner of the property.

The one-story, gabled roofed frame building sits on a rock and masonry cement foundation. The school maintains a southern façade orientation, measuring approximately 31 feet east to west and 45 feet north to south. A 7 foot, 11 inch by 11 foot, 5 inch vestibule projects from the southern façade.

The rectangular school is surmounted by a galvanized metal gable roof. A small wooden bell tower, covered with a galvanized metal gable roof rises from the vestibule's roof. The vestibule was added in the early 1900s. A new foundation was poured in 1977.

Three, 4/4 double-hung, wooden sash windows fenestrate the east and west sides of the building. A brick chimney rises on the west side of the building.

Two double-hung windows flank the vestibule's entry door. An aluminum storm door stands in place of the original wooden door. Tongue and groove siding finishes the vestibule's walls and ceiling, an oak floor provides a solidly well-worn platform within the entryway. Original coat hooks and lunch shelves line the vestibule's east wall. A five-panel wooden door leads from the vestibule into the classroom. The original glass transom over the classroom door has been replaced with wood.

The classroom measures 23 feet, 1 inch by 32 feet, 1 inch. The interior walls are wood lath and plaster, tongue and groove wainscoting accents the walls. The wainscoting measures 28 inches high and is capped with a chair rail. Oak floors are used in the classroom space. A seven inch raised stage is located across the north end of the room. A double door wooden cupboard with shelves projects from the south wall, on west side of the entry door. The flue for the stove-pipe rises along the west wall, connecting to the brick chimney on the roof above.

United States Department of the Interior
National Park Service

National Register of Historic Places
Continuation Sheet

Section number 7 Page 2

A small propane furnace enclosed in wood paneling stands in the northwest corner of the room. A small air conditioner has been installed in the south wall on the east side of the entry door.

The original wood lath and plaster ceiling has been replaced with sheet rock. Six rectangular florescent light fixtures hang from the ceiling.

The Virginia School closed at the end of the 1962 school year. When the school closed in 1962 the land reverted back to the landowner. The building was purchased by the landowner and was used as a church until the fall of 1999, when the property was sold to the current owner. Although the building is now vacant it still maintains a high degree of exterior and interior architectural integrity typical of a rural one-room school.

United States Department of the Interior
National Park Service

National Register of Historic Places
Continuation Sheet

Section number 8 Page 1

The Virginia School (c. 1877) is being nominated to the National Register under criteria A and C for its historical association with education in Johnson County, Kansas, and for its architectural significance as a one-room schoolhouse. The Virginia Schoolhouse served Johnson County School District Number 33 from its completion in the fall of 1877 until 1962, when unification forced its closing.

Virginia School exemplifies the prototypical, one-room country schoolhouse in its form and design. The one-story, front-gabled schoolhouse is typical of the one-room prairie schoolhouses constructed in rural Kansas during the last half of the nineteenth century. A vestibule capped by a small cupola projects from the building's façade. The large, 4/4 double hung windows provided much needed breezes to cool the classroom. During cold weather, it was heated with coal.

The school represents one of many one-room schoolhouses that were constructed every three miles or so in each township. These schools were funded with public money and usually stood on an acre of land donated by a farmer. Until consolidation forced the closure of many of Kansas' one-room schools in the 1950s and 1960s, Kansas children learned their ABCs and algebra in small groups taught by only one teacher.

School District Number 33 was organized in 1865. District Number 33 was supervised by the Johnson County School Superintendent and an elected school board. The first school building was located one half mile east of the present Virginia School. The 1874 Monticello Township map shows the 1865 school was located on Henry Mize property. The 1865 schoolhouse was sold when the new 1878 school was built and moved to a nearby farm.

In 1875 C. J. and Sarah Mize deeded one-acre to school district #33 for a new school. Records show the Mize family, some of the township's earliest settlers, were dedicated to educating children of the community. The schoolhouse was erected in the fall of 1877 with the first school term beginning January 1878.

In 1878 the area surrounding the school was a rural farm community. No village or incorporated town existed within approximately three miles of the school. The closest small towns of Wilder and Monticello were located north and east of Virginia School.

In 1878 average monthly salary for teachers in Johnson County was \$37.40 per month for male teachers and \$21.88 per month for female teachers. All schools in Johnson County held seven or nine month school terms in 1878. The first term in the new Virginia School

United States Department of the Interior
National Park Service

National Register of Historic Places
Continuation Sheet

Section number 8 Page 2

began January 1878 and closed the week of March 21, 1878, making the 1877-1878 school year a seven-month school.

Christian (Chris) Wagner helped build the Virginia School in the fall of 1877. Four children of Chris and Mary Jane Wagner, early Monticello area settlers, attended the school in 1898. Twenty-seven students were enrolled in Virginia School in 1898. School was taught by Mattie Hoy, a 21 year old who had attended school district #42, about two-and-one-half miles north of Virginia. One of these Wagner children, Harry, taught at Virginia School in the early 1900s. Harry married in 1910, went into the mercantile business and died in 1912.

In addition to the regular school curriculum, Virginia School provided a location for other activities. In 1878 Louis A. Gleason conducted a writing school at the building. Church services and Sunday school were held at the school. The community enjoyed debates and programs through a lyceum program that was held at the new school.

The early twentieth century witnessed the growth of the school community. After 1900 school enrollment averaged around 30 students a year, rising to as many as 57 pupils in 1920. However, enrollment dropped markedly during the Depression years of 1929 to 1933, sometimes to as few as 10 students. After World War II the enrollment began to climb, necessitating the construction of a second building in 1954. School records for 1917 show the district used the Standard Kansas State Series of textbooks.

Forty-six students were enrolled at Virginia School in 1921, the teacher's salary was \$140 a month for the eight-month term. Ada Barth was one of 26 female students enrolled at the school in 1921, their ages ranging from 7 to 20 years. Ada's father, William G. Barth served as School Board Clerk in 1921. Later, her brother Bill Barth, served as the last School Board Clerk in 1962.

Ada Barth taught at the school from 1933 to 1937, when, according to her family she stopped teaching to get married. During the 1930s and 1940s students used the Bobb's Merrill *Primer and Readers*; the classroom contained a large world map that pulled down from the ceiling in front of the blackboards and the globe that hung from the ceiling.

As many as three and four generations of the same families attended school as students, taught as teachers and served on the various school boards. Members of these same families still live in the community, as close as one-half mile from the schoolhouse.

Virginia School continued to be the center of school and community activities during the 1940s and 1950s. The school provided opportunities for socializing and cultural exchanges. The annual Mother's Day Teas held in the 1950s were planned and organized by the children and supported one hundred percent. Even working mothers took time off to attend.

The community rallied to provide anything needed by the school. An active Mothers Club was organized in the late 1940s for organized activities including fund raising for improvements to the school. The school was upgraded with electric lights replacing kerosene lights, a cistern with water pump replacing the old well. An oil-burning furnace replaced the wood and coal-burning stove.

Because of increased attendance a second separate building was built west of the 1877 schoolhouse in 1954. Grades 5 through 8 attended the old building and grades 1 through 4 attended the new building. With the construction of the second building, the school board hire two teachers, one for each building. Ruth Lynn, teacher and later principal of the two schools, taught from 1955 to 1962, when the school closed.

The school continued to be directed by the local school board and Johnson County School Superintendent until closure in 1962. After the school closed, all equipment was auctioned including the large bell. At the auction, Ruth Lynn's husband purchased the bell and presented it to her as a memento of the many years she rang it to call he children to class. Ruth, now 91 years old, still has the school bell. The bell had been used as a dinner bell on the Huston farm, part of the same land parcel the school buildings were located on. The Huston family had donated the bell to the school district.

In 1962 the one-acre tract reverted to the current landowner as specified in the original deed. The 1954 school building was sold and removed from the property. The Virginia School was purchased by the landowner and leased to a local congregation for a church until 1999 when the property was sold. The building maintains a high degree of architectural integrity and is currently vacant.
